Dianna and her team at Shine at Business have been helping us with our tax this year and what a breath of fresh air I have found her to be. After a succession of unhelpful accountants who didn't seem to be all that interested in anything other than getting paid to do as little as possible. I have found Dianna's creative accounting to be not only easier to follow than the technical jargon I am usually presented with, but also incredibly thorough.

Dianna has reversed accounting errors made by previous accountants that weren't noticed or corrected. She has helped us to understand what needs to be done differently and has asked questions to help her team to get a better understanding of how OUR business operates so they can better serve us.

She doesn't just do accounting, she advises on business structure and who can help in areas that need improvement or development. She is a one stop business financial health check shop.

If you need an accountant/financial adviser who can really help you to Shine at Business then I highly recommend Dianna and her team.

Loenie Woodham & Jessikah Dodkins
